

DUST OFF

Antistatic non-silicone for surfaces

FEATURES

New formulated liquid with antistatic action for the anti-dust treatment of any surface. Thanks to its particular formulation, **DUST OFF** neutralizes the electrostatic charges that accumulate on the surfaces making them more stable bright over time. Not containing silicone derivatives, the opaque effect that occurs over time when using products containing them is avoided. Equipped with excellent cleaning power, it is ideal for surfaces in glass, crystal, wood and any type of plastic material. It contains a new generation of highly biodegradable and low-foaming surfactants that make the product easy to spread and dry.

DUST OFF is ideal for the cleaning / dust-proof treatment of tiled walls, mirrors, glass, marble and parquet floors as well as furniture in general.

HOW TO USE

Don't use the pure product but diluted in water at 20 - 50 grams per liter.

Spray on surfaces or pour over the surfaces and wipe with a clean cloth until the product evaporates completely.

Repeat the treatments according to your needs.

WARNINGS: don't mix with other products.

CHEMICAL/PHYSICAL DATA

Physical state	: liquid
Density _(15°C)	: 1,0 Kg/lt
pH _{1%}	: 7,0
DL ₅₀ acute oral	: 410 mg/Kg*

* on rat, relative to non-ionic surfactant.
