Detergent formulated to clean and sanitize any washable surface, leaving a delicate clean smell.

- Safe on all metals, plastics and rubber.
- Non-irritating and usable without special precautions.
- No need to rinse.
- Can be used without problems even on painted surfaces.

Physical state : Spray bottle

Color: colorless

Odor: floral

pH: 7 (solution 1%)

Solub. in water: total

- **In offices** it is suitable for the cleaning of desks, computer bodies, typewriter shells and calculators, fax machines, telephones, photocopiers and printers.

USE

The **FORMAT PC SPRAY** can be used to clean plastic, metal, painted surfaces, in leather or imitation leather, ceramic, marble and carpets.

The product, in addition to cleaning and sanitizing surfaces, also gives good anti-static properties, which prevent the electrification of surfaces and the associated accumulation of dust.

FORMAT PC SPRAY is widely used in various sectors:

- **Hotel, hospital and community** for cleaning the canteen, tables and work benches, changing rooms, toilets, laboratories and for the cleaning of glass and washable walls in plastic or painted material.
- **In the automotive sector** for cleaning the fake leather interior of cars, dashboards and instrumentation.

HOW TO USE

Shake the bottle well before use and spray the solution on the part to be cleaned from bottom to top to prevent sagging.

Wait a few minutes so that the product can perform its cleaning action and remove the dirt with a soft cloth or paper towels. Avoid spilling excessively the product on keyboards and uncovered electronic parts. If necessary use the product **WIND (air spray)**, for a quick drying.
