

KEM TABS

Sanitizing tablets

FEATURES

KEM TABS is a sanitizer for air conditioning systems.

It is a specific sanitizing detergent, in the form of a tablet, which prevents problems related to the possible stagnation of water in the collection tanks of the air conditioning systems.

It also contains corrosion inhibitors and detergents that keep the drains clean and free from fouling, preventing the formation of unpleasant odors.

HOW TO USE

Place the pads in the conduit or condensation containment tub at the furthest point from the drain.

The number of pads to be used is determined by the size of the implant. For a unit up to 12,000 BTU, it is generally recommended to use 1-2 tablets for every 15-20 days.

KEM TABS is a specific sanitizing agent in controlled dissolving plants. Its regular use produces adverse conditions for bacterial proliferation.

- It effectively controls and hinders the formation of algae and silt.
- Contributes to maintaining the efficiency of the system.
- Reduces the risk of microbial growth.
- Compatible with aluminum, copper, steel and plastic materials.

CHEMICAL / PHYSICAL DATA

Physical state	: solid in tablets
Density(20°C)	: 0.93 Kg/dm ³
Solub. in water	: little soluble
PH (sol. 1%)	: 7,6 +/- 0.5
Active principle	: 10%

USE

Use protective gloves for handling. Avoid contact with eyes and skin and in case of contact wash with plenty of water. Under normal conditions of use, there is no direct contact with the product, therefore without danger for the operator. We recommend that you read the SDS

PACKAGING

Blister of 8 tablets in boxes of 20 blisters
