

## KEMPERSOLV PV

Pre-painting degreasing solvent

### FEATURES

Mixture of organic solvents with high degreasing power.

To be used mainly in cleaning / degreasing metal surfaces before painting.

The product is made with selected raw materials has a high degreasing power that allows you to quickly and easily clean metal surfaces before painting.

**KEMPERSOLV PV** is also rapidly evaporating, leaving surfaces perfectly dry in a short time.

Due to its characteristics it can also be used advantageously for cleaning brushes and airbrushes as long as the paints are not hardened.

### HOW TO USE

Apply as it is with clean rags or brushes. Avoid using other materials unless previously tested.

Store the product in tightly closed containers and away from flames and heat sources.

Do not smoke during use.

For further information consult the safety data sheet.

### CHEMICAL PHYSICAL DATA

|                                   |              |
|-----------------------------------|--------------|
| Physical state                    | : liquid     |
| Color                             | : colorless  |
| Odor                              | : aromatic   |
| Specific weight <sub>(20°C)</sub> | : 0,850 Kg/l |
| Flammability                      | : <23°C      |
| Solub. In water                   | : insoluble  |
