

MASTERFIL J

Iodophor gel filming after milking

PRODUCT NOT INTENDED FOR ITALIAN MARKET

FEATURES

MASTERFIL J is a low dripping gel product designed to film and protect the teats and sphincter between successive milking, while allowing complete transpiration of the epidermis.

The regular use of the product contributes to the prevention of the onset of mastitis phenomena and guarantees a better microbiological quality to the milk by virtue of the sanitizing agents used.

The product, thanks to the wide spectrum of action of the PVP iodine complex, is effective not only against microorganisms such as *streptococci* and *staphylococci* which constitute the usual bacterial flora that populates the terminal traits of the milk channels but also towards many other pathogenic species. It also allows you to control the development of fungi and yeasts.

The post-milking application therefore plays the essential role of removing the external contaminating bacteria from the breast and, at the same time, blocking their diffusion within the above-mentioned channels until the next milking.

MASTERFIL J is recommended in all livestock farms where milking operations are carried out buffalo, goat and sheep). The emollient and humectant compound preserves the integrity of the nipple throughout the year, with particular reference to the hot season, preventing reddening and cracking also due the cold. to The color also allows a simple identification of the treated items.

SAFETY

The product is free of risk symbols (according to Dir. 2001/59 / CE XXVIII ° adaptation).

HOW TO USE

At the end of the milking, dry the breasts with disposable paper and apply

MASTERFIL J on the nipples of the animals.

The product will be a protective film along the

length of the nipple and will form at the sphincter a permanent drop, with the function of preventing the entry of germs and bacteria into the milk ducts.

Before the next milking, remove the film, washing the nipples with drinking water and then removing the first jets of milk.

MASTERFIL J is ready to use and should be used as it is.

CHEMICAL/PHYSICAL DATA

Physical state: viscous liquid intense brown
Active principle: iodine(1000 ppm)
Density_(20°C): 1,02 ± 0.05 Kg/dm³
Solub. in water: complete

Solub. in water: complete pH: 5.5 ± 0.5

STORAGE

Keep the product in the original containers tightly closed, away from direct sunlight. Protect from frost.
